This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

1694.

Apollo Anglicanus,

THE

ENGLISH APOLLO:

Assisting

All Persons in the Right Understanding of this Years Revolution, as also of things past, present, and to come.

With necessary Tables plain and useful.

A twofold Kalendar, *viz. Julian* or *English*, *Gregorian* or *Forain* Computations, more plain and full than any other, with the Rising and Setting of the Sun, the nightly Rising and Setting of the Moon, and also her Southing, Exactly calculated for every day. Of general use for most men.

Being the Second after *Bissextile* or *Leap-Ye.*

To which is added the Moons application to the fixed Stars: With the Calculation of the Eclipses: also Rules and Tables for the measuring of Timber: with many other things both pleasant, useful and necessary.

Calculated according to Art, and fitted to the Meridian of *Leicester*, whose Latitude is 52 Degrees, 42 Minutes. Exactly serving all the middle Counties of *England*, and without sensible Error the whole Kingdom.

By RICHARD SAUNDER,

Student in the Physical and Mathematical Sciences.

LONDON: Printed by M. CLARE, for the Company of STATIONERS. 1694.

William & Mary		1650	1688, Feb. 13	Whom God grant long to live.			

You here may ſee a Race of Monarchs great,
Each for a time did fill the Royal Seat,
Then left the Throne: You ſee it fill'd again;
Pray God that theſe long time o'er us may reign;
Their Subjects multiply, their Foes decreaſe,
Their Kingdoms have Proſperity and Peace. *Omnis poteſtas à Deo eſt.*

To find the time of High-water in most Coasts of England.

FIrst seek the Moons Southing on the foregoing Table for your day, for then you may conclude it High-water at *Southampton*, *Quinborough*, and *Portsmouth*, for here the South and North Moons make a High-water: But when you desire the time of full Sea in any of the following Coasts in the ensuing Table, find the name of the place, and see how many Hours and Minutes be annexed thereunto in the Column under H. M. which added to the time of the Moons coming to South, gives you the time of High-water for the place required.

A Tide-Table, with the Names of the Havens.

	H.	M.
Rochester, *Malden*, *Aberdeen*,	0	45
Gravesend, *Romney*, *Ramkins*,	1	30
London, *Tinmouth*, *Hartlepool*,	3	0
Frith, *Leith*, *Dunbar*, *Narbon*,	4	30
Newcastle, *Falmouth*, *Humber*,	5	15
Lyn, *Antwerp*, *Plymouth*, *Hull*,	6	0
Bristol, *Lanton*, *Foulness*,	6	45
Milford, *Bridgwater*, *North-coast*,	7	30
Portland, *Peterport*, *Hartflew*,	8	15
Dover, *Yarmouth*, *Harwich*, *Dublin*,	10	30
Calliee, *Rye*, *Winchelsey*, *Calshot*,	11	15

Example.

The 17. of *Sept.* this Year it is required to know the time of High-water at *London*: By the Tab. of the Moons Southing, over against the 17. of *Sept.* I find the Moon South at 7 Hours 30 Minutes in the Afternoon. Then in the preceding Tide-Table against *London*, I find 3 Hours 0 Minutes, which added to 7 Hours 30 Minutes, makes 10 Hours 30 Minutes, being the time of High-water at *London* the 17. day of *Sept.* in the Afternoon. So of any other.

NOTE, That the Tide floweth one point of the Compass more at the New and Full of the Moon, than at the First and Last Quarters; as also the Latitude of the Moon and Winds, may alter it an hour sooner or later.

Directions for the ſubſequent Diary or Almanack.

IN the firſt Column to the left hand, on the left-hand Page, you have the Numerical Figures of the days of the Month.

In the ſecond Column you have the week days, and the Dominical Letter.

In the third Column you have the Saints days, and the places of the Planets once a Month; as alſo the Moons application to the fixed Stars, by which the Aſteriſms and Conſtellations may be eaſily known to an ingenious eye and underſtanding.

In the fourth Column the Moons place in the Zodiack every day at noon.

In the fifth Column the Riſing and Setting of the Moon, with reſpect to her Latitude.

In the ſixth Column the Mutual Aſpects of the Planets, with the general ſtate of the Weather.

In the firſt Column on the Right-hand Page you have the Engliſh Account.

In the ſecond Column you have the Roman Account.

In the third Column the Roman Week days.

In the fourth Column the perfect Roman Kalendar, and Saints days.

In the fifth Column you have Poetical Stories of the fixed Stars and Conſtellations, ſhewing the reaſon why ſuch various Figures are fancied to be placed in Heaven.

The ſixth, ſeventh, and eighth Columns, the utmoſt to the Right hand, ſhew you the daily Riſing and Setting of the Sun.

On the top of the left hand Page is ſet the New and Full Moons, with the Firſt and Laſt Quarters.

On the top of the right hand Page is ſet the Riſing, Southing and Setting of the Planets.

January hath xxxi. days.

Full Moon the 1 day, at Noon.
Laſt quarter the 8 day, at 7 at night.
New Moon the 15 day at 1 in the afternoon.
Firſt quarter the 23 day, at 5 in the morning.
Full Moon the 31 day, 40 min. paſt 3 in the Morning.

13	8	10	3
14	9	3	6
15	9	8	5
16	10	1	3

The Uſe and Explanation of the

TABLE.

The firſt Column towards the left Hand ſheweth the Years of a Leaſe, or Annuity, and right againſt each Year, is the Years, Months, and Tenth Parts of a Months purchaſe, that ſuch a Leaſe or Annuity is worth. Example: *Suppoſe a Leaſe or Annuity to continue 12 Years, and you would know how many Years purchaſe it is worth in preſent Money, look in the Table for Twelve Years of a Leaſe in the left Hand, and againſt the ſame you ſhall find 8, 4, 6, which ſheweth that ſuch a Leaſe is worth 8 Years, 4 Months, and 6 Tenth parts of a Months Purchaſe.*

Years of the Leaſe.	Years.	Months.	10th parts.
17	10	5	8
18	10	9	3
19	11	1	9
20	11	5	7
21	11	9	3
22	12	0	5
23	12	3	6
24	12	6	6
25	12	9	4
26	13	0	0
27	13	2	5
28	13	4	9
29	13	7	1
40	13	9	2
31	13	11	1
32	14	1	0

AGAIN:

If you are to take or buy the Reverſion of any Leaſe or Annuity, work thus; Suppoſe the Leaſe to be Thirty Years in all, you find in the Second Table and Right Hand againſt Thirty, 13 Years, 9 Months, and 2 Tenth Parts of a Months Purchaſe, as if it were worth were it in preſent Poſſeſſion. But ſuppoſe there is a Leaſe of five Years (more or leſs) before you commence, look in the Table againſt the five Years, and there you find four Years, two Months, and 5 Tenth parts of a Months purchaſe: take this out of the Sum againſt Thirty, which is, 13, 9, 2. The remainder is, 9, 6, 7, which is 9 Years, 6 Months, and [illegible] Months; and ſo much is the Reverſion aft-

Saturn *is South at Midnight.*
Jupiter *sets betwixt 9 and 10 at Night.*
Mars *sets between 10 and 11 at Night.*
Venus *riseth betwixt 1 and 2 in the Morning.*
Mercury *goeth to Combustion.*

Moons Riſing.

Moons Setting.

We may expect about the 3d or 4th day ſome ſhowers of Rain; then 'tis hoped we may have ſeaſonable and good Harveſt weather for ſome days ☌ ☍ ♄, But the New Moon produceth ſhowry weather, ☀ ☿ ♀, and 'tis feared may continue; with ſhowers alſo about the 17th day; afterwards it is hoped we may have ſeaſonable weather for ſome days: But the 23th or 24th days bring Miſts or drizling Rain, and continue ſhowery; ♂ ☉ ☿ afterwards windy, and 'tis hoped, fair for the moſt part, to end of the Month.

Saturn *at the beginning sets about Midnight, at the end he sets between* 10 *and* 11 *at Night.* Jupiter *emergeth from the Sun-beams, and riseth before him.* Mars *sets betwixt* 8 *and* 9 *at Night.* Venus *rises about* 2 *in the Morning.* Mercury *at the beginning sets after the Sun, at the end he is Combu*
